The professional care we offer

Scoonie House offers a range of short-term respite, convalescent and permanent nursing care packages. We carefully assess all of our prospective residents to ensure we can meet their specific care needs. A person-centred care plan is then developed, which sets out the tailored package of care and hospitality as agreed.

Led by our Home Manager and Registered Nurse, the Scoonie House care staff receive ongoing training, which enables them to build on the excellent reputation the home has earned for high quality nursing care provision.

All of our residents benefit from our wealth of expertise, experience and close relationship with our local GP's, physiotherapist and health and social care organisations.

Scoonie House benefits from a robust approach to clinical governance. Our dedicated Care Services Team monitors and regularly inspects every home to a level beyond the national standards set out by the Care Inspectorate.

Nursing Care

Scoonie House has been carefully developed to provide high quality nursing care. The home is set up to enable mobility in a safe environment and our care staff have years of experience in supporting residents to be as independent as possible, whilst providing appropriate care as it is required.

Care is provided closely in line with each resident's person-centred care plan, which details not only specific healthcare needs,

but also personal preferences in every aspect of their daily life. We appreciate the positive impact that family involvement can have in a residential care setting and we welcome active involvement and feedback from family members.

Convalescence Care

Surgery and illness can place a tremendous strain on the body, so the quality of nursing care received during the immediate period of recovery is extremely important.

At Scoonie House, we can provide the highest level of convalescence care for those who no longer need 24-hour medical support, such as elderly patients waiting to be discharged, stroke patients and those recovering from a debilitating illness.

The convalescence care we provide ensures a well-managed recovery process including a full assessment of individual needs, thereby reducing the risk of complications and the likelihood of needing further treatment or a return to hospital.

"Don't walk in front of me, I may not follow; Don't walk behind me, I may not lead; Walk beside me, and just be my friend."
